

# AN3841SR

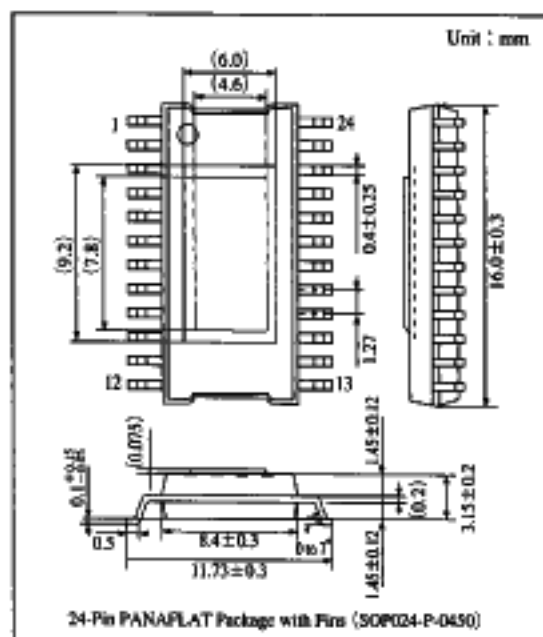

## Capstan Motor Driver IC for VCR

### Overview

The AN3841SR is an IC designed as VCR capstan motor drive. It can reduce the torque ripples, noises and vibrations of the motor.

### Features

- Built-in output transistors.
- Built-in torque ripple cancellation circuit.
- Overlapped driving.
- Output pin electrolytic capacitor unrequired.
- Built-in thermal protector circuit.
- Max. output current 1.5A.
