

## 18W CAR RADIO POWER AMPLIFIER—YD1028

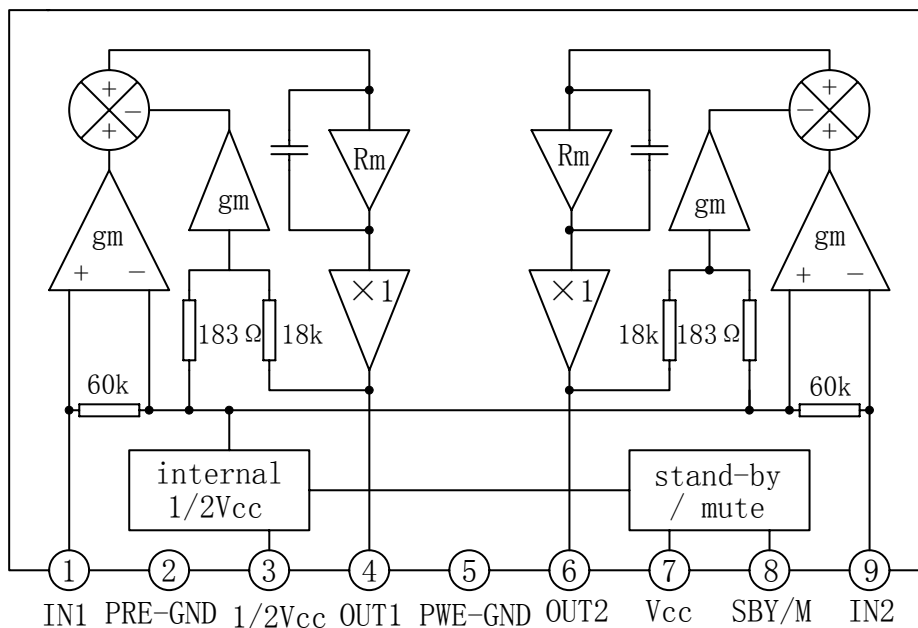

### DESCRIPTION

The YD1028 is an integrated class-B dual output amplifier in a 9-lead single in-line (TO220Z9) plastic power package. The device is primarily developed for car radio applications.

### FEATURES

- \*Requires very few external components for Bridge Tied Load (BTL), Stereo or BTL application;
- \*High output power, Fixed gain, Good ripple rejection;
- \* Identical inputs (inverting and non-inverting), Low offset voltage at output (important for BTL);
- \*Mute/stand-by switch, No switch-on/switch-off plop;
- \*Load dump protection, AC and DC short-circuit-safe to ground and Vcc, Thermally protected;
- \*Reverse polarity safe;
- \*Capability to handle high energy on outputs (Vcc=0V);
- \*Protected against electrostatic discharge.
